GENERAL CONSENT

Thank you for choosing our office for your dental care. We will work with you to help you achieve excellent oral health. While recognizing the benefits of a pleasing smile and teeth that function well, you should be aware that dental treatment, like treatment of any other part of the body, has some inherent risks.

These risks are seldom great enough to offset the benefits of treatment, but should be considered when making your treatment decisions.

Benefits of dental treatment can include: relief of pain, the ability to chew properly, and the confidence and social interaction that a pleasing smile can bring. Nonetheless, there are some common risks associated with virtually any dental procedure, including:

1. Drug or chemical reaction. Dental materials and medications may trigger allergic or sensitivity reactions.
2. Long-term numbness (paresthesia). Local anesthetic, or its administration, while almost always adequate to allow comfortable care, can result in transient, or in rare instances, permanent numbness.
3. Muscle or joint tenderness. Holding one's mouth open can result in muscle or jaw joint tenderness, or in a predisposed patient, precipitate a TMJ disorder.
4. Sensitivity in teeth or gums, infection, or bleeding.
5. Swallowing or inhaling small object.

While we follow procedural guidelines, which most often lead to clinical success, there are occasional cases, as in any medical treatment, that do not turn out as planned. We will do our best to assure that it does. Please feel free to ask questions regarding all dental procedures that are recommended to you.

I UNDERSTAND AND CONSENT TO THE ABOVE

A Special Note to New Patients for Your First Visit:

A Professional Cleaning performed by a dental hygienist or a dentist is a medical procedure and must be prescribed by a qualified health care practitioner. In some cases, dental conditions exist that must be addressed before a cleaning may be possible. In these circumstances, other types of treatment may be required first in order to best provide for the health of the patient.

*Because of this, legally and ethically, an examination and diagnostic x-rays, as required by the dentist, must be done before a cleaning can be given. After a thorough examination has been performed and the x-rays have been evaluated, the doctor will determine whether or not a cleaning is the appropriate next step, or if a different procedure is required first. **Given the length and thoroughness of our examinations, the cleaning is not guaranteed to be performed at your first visit.***

Dr. Kasper and her staff are fully committed to helping their patients achieve and maintain healthy teeth and gums for the long term. The procedures we follow are in the best interest of achieving this goal for as many of our patients as possible.

I have read and understand the above message. I will take the opportunity to ask any questions I may have pertaining to this statement by phone prior to my first appointment or address the questions during my initial examination appointment.
